

Our tatty, tired Toyota

Has done sterling work for us. It has made over 30 trips to hospital this year the latest, only last week ago with a babe in arms, very sick with malaria and pneumonia, to hospital. (It also brought her safely home again)

It has been a lifeline for us carrying everything, water, bricks, blocks, food, supplies and people up and down our mountain as well as further afield.

Time and a hard life are catching up on this old stalwart, in the last week or

so we

have

repaired

broken

springs, punctures, electrical

problems, brakes etc - things

are going wrong faster than

we can fix them.

We have a chance to get a replacement - a Toyota Landcruiser Prado in good condition for not a lot of money - \$9,000 but we need to find the money before the end of November.

Any contribution no matter how small would really help
